1 Correction

SPOUGE, J.L. (2007). Markov additive processes and repeats in sequences 44, 514-527

Immediately above Eq (1.1) and following Eq (2.1), explanatory sentences contain an incorrect formula for the Perron-Frobenius eigenvalue $\rho$ (see [1, p.27-28]). In fact, some non-negative matrices $A$ with convex elements do yield a non-convex eigenvalue $\rho$, e.g., let $A$ be $2 \times 2$ with $a_{1,1} = a_{2,1} = a_{2,2} = 1$ and $a_{1,2} = |\theta|^{3/2}$.

The incorrect formula does not affect results outside the sentences.
